How can Labour Improve Access to Nature in Towns and Cities?

Labour Party Conference Fringe Event 2024

People in towns and suburbs feel less connected to nature

Relating to your relationship to nature, where would you place yourself on the following scale?

● 1 - I feel completely connected to nature ● 2 ● 3 ● 4 ● 5 - I feel completely separate from nature ● Don't know

The mandate for better access to nature across area and segment

Support for increasing access to nature is strongest in the Red Wall and among Progressive - uniting the Labour coalition

Thinking about your local area, would you support or oppose introducing the following:

More green spaces

● Strongly support ● Somewhat support ● Neither support not oppose ● Somewhat oppose
● Strongly oppose

Thinking about your local area, would you support or oppose introducing the following:

More green spaces

● Strongly support ● Somewhat support ● Neither support not oppose ● Somewhat oppose
● Strongly oppose

What drives this support? Pride in local nature

What, if anything, are you proud of about your local area? Select all that apply.

Connection to nature increased during pandemic

A quarter of Britons say they used local parks more during the pandemic. In focus groups, many told us they appreciate nature on their doorstep more when they were forced to stay at home. For others, it increased the frustration that they had no proper access to nature .

I spend a lot more time outdoors. I'm working from home for two years now since the pandemic, and now I spending a lot more time outdoors. I feel like I'm in a better place than what I was when I was at work, 9:00 to 5:00, every day

Jamie, Loyal National, Wirral

I think as well, during lockdown, people were lucky if they even got a garden. At first, we couldn't go out at all. People are in flats and things like that have got no space to go outside. How much that impacted on their mental health to not even go out and have a walk outside?

Laura, Loyal National, Northumberland

I work at a huge country park, 3,600 acres. Dozens of visitors have said to me over the COVID lockdown period, how it's actually saved our mental health, being able to walk from miles and miles and virtually see nobody. I hadn't realized how good walking and the countryside until I took this job

Chris, Loyal National, Wirral

I think we took it for granted, going out and stuff, before lockdown. And then lockdown brought it all along, much actually. We need to be outside and connecting with nature again, just the simple things in life.

Laura, Loyal National, Wirral

Public more reliant on local nature during cost of living crisis

The cost of living crisis has also made more of the public more reliant on local nature and highlighted for others the limited access to nature that they have in their local area.

When the cost of living crisis made day trips away not possible for many, nature on their doorstep became something they valued more, or realised they had less access to.

For those most affected by the cost of living crisis, money was not the only constraint they talked about on access to nature, but the time to spend in nature as well - particularly those working several jobs at once

So for me to get that piece, I need to factor in half a day or a day. I don't know whether I'm going to give myself an hour in this nature place or two hours, or I've got to... I can't say have an extra hour. I can't work from home for instance, and then go, "Oh, I have a lunch break. Let me go and find some nature." Because by the time I find nature, my lunch break is finished and my boss is wondering why I'm not back online

Angel, Disengaged Battler, Streatham

I kind of believe it's both time and money, but I do also mainly believe that everyone does have access, it's just whether you can go to actually spend some time in nature

Jay, Disengaged Battler, Streatham

Nature on your doorstep matters most

In our focus group conversations, the public are clear that the nature which matters most to them is that which is on their doorsteps

Whether that is the park at the end of the street, the window boxes they're proud of, the patch of grass outside their house - all of these pieces of nature give people great pride.

To meet the public's expectations, improvements in access to nature in towns and cities must show how they can deliver better everyday access to nature, not just bigger projects

I think the little parks, the estate parks, that's where the kids hang out. That's where they go. They don't go to town park because there's too many adults, they hang out on the little ones on the estates, they're all together

Jayne, Loyal National, Telford

You can see money's been poured into the big parks like Hanley and stuff, but just not in the little ones. I just think it's a shame because that's where lots of people can actually get to

Laura, Disengaged Traditionalist, Stoke-on-Trent

Anti-social behaviour also key challenge on access

Which of the following, if any, do you think would improve your local park? Select up to three.

For the public, better access to nature also means overcoming some of the practical problems they see on accessing nature locally - particularly on anti-social behaviour.

In focus groups, many also say that there is little point in investing in better access to nature and green spaces in local areas if they are going to be vandalised or not well maintained.

What's the point in making the area look nice if it's just going to end up getting vandalised in a couple of months? Ellie, Loyal National, Oldham

**Why might nature access
matter more broadly?**

Protecting nature is the public's top climate concern

Which of the following impacts of climate change are you most worried about over the next 10 years? Select up to three. Climate change might...

Rank	All	Progressive Activists	Civic Pragmatists	Disengaged Battlers	Established Liberals	Loyal Nationals	Disengaged Traditionalists	Backbone Conservatives
1	Harm nature and wildlife 35%	Harm nature and wildlife 52%	Harm nature and wildlife 46%	Harm nature and wildlife 39%	Harm nature and wildlife 32%	Cause my bills and other costs to rise 37%	Cause my bills and other costs to rise 30%	Harm nature and wildlife 31%
2	Cause my bills and other costs to rise 32%	Cause hardship for the world's poorest 42%	Have a negative impact on my children/grandchildren's futures 36%	Cause my bills and other costs to rise 30%	Increase the risk of floods 29%	Harm nature and wildlife 35%	Increase the risk of floods 26%	Cause my bills and other costs to rise 30%
3	Increase the risk of floods 29%	Have a negative impact on my children/grandchildren's futures 36%	Cause my bills and other costs to rise 33%	Have a negative impact on my children/grandchildren's futures 25%	Cause my bills and other costs to rise 26%	Increase the risk of floods 29%	I am not worried about climate change affecting my life in the next ten years 25%	Increase the risk of floods 30%

Connection to nature can drive climate behaviour changes

Relating to actions you can take to help tackle climate change, where do you place yourself on the following scale?

Connected to nature

Separate from nature
